Github : https://github.com/saurshra

Motivated and enthusiastic third-year engineering student with skills in JavaScript, React.js , Node.js , Express.js , MongoDB , along with a solid foundation in API integration, authentication, authorization, and responsive UI design. Passionate about building scalable web applications and continuously enhancing my technical expertise through hands-on projects and learning.

## PROJECTS

**Myntra Website UI Recreation**
Myntra.com

- Designed a responsive UI inspired by the Myntra website using HTML, CSS, and JavaScript. Emphasized layout, styling, and interactivity to mirror the user experience of a professional e-commerce platform.

**FocusFlow-Task Manager Application**
TaskManager

- Built a task manager app using React hooks and Context API, with features for task creation, deletion, and dark/light theme toggling.

**Portfolio**
https://saurshra.github.io/dev-portfolio/

- Built a dynamic and responsive personal portfolio using React to highlight my projects, technical expertise,and achievements.
- Designed with a modern UI, the portfolio ensures seamless navigation and accessibility across devices.

**CryptoCurrency**
CryptoCurrency

- A real-time cryptocurrency tracking app built with React.Users can view live market prices and interactive charts for each cryptocurrency.This also allows users to convert crypto prices into different country currencies for better insights.

**UrbanNest**
UrbanNest

- UrbanNest is a full-stack web app for property listing, searching, and renting, built with React, Node.js, and MongoDB.
- It supports secure authentication, dynamic client-server interaction, and efficient data handling.

## EXPERIENCE

**FRONTEND DEVELOPER**
Web Professionals
present

- Developing and optimizing React.js applications with a focus on responsive UI, state management, and API integration.
- Implementing authentication, authorization and performance enhancements to improve user experience & application ease

## EDUCATION

**Universal College of Engineering, Kaman, Vasai East**
Bachelor of Computer Engineering (3rd Year)
Expected Graduation Year: 2026

**Secondary School**
Thomas Baptista JuniorCollege
2019- 2021

## Technical Skills

- Frontend
- Backend
- Tailwind CSS, Bootstrap

- Project Management Tools
- Database : MongoDb ,SQL
- Creative & Professional

- Tool & Platform :Git, GitHub
