Github : https://github.com/saurshra   in https://www.linkedin.com/in/saurshra/

Motivated final-year engineering student with hands-on experience in building full-stack applications using MERN. Skilled in API development, authentication/authorization, state management, and responsive UI design. Developed and deployed real-world projects, including decentralized and scalable web applications. Eager to contribute to impactful engineering teams while continuously expanding technical expertise through practical, project-driven learning.

PROJECTS

● **EventHub**
https://eventhub-045b.onrender.com/

- EventHub is a dynamic event management web app that lets users discover and register for technical, cultural, social, and sports events. It offers secure email OTP signup, real-time Razorpay payments with instant ticket confirmation, and an admin dashboard for efficient event management. With its clean UI and responsive design, it simplifies event participation for students and institutions under Mumbai University.

● **CryptoCurrency**
CryptoCurrency

- A real-time cryptocurrency tracking app built with React.Users can view live market prices and interactive charts for each cryptocurrency.This also allows users to convert crypto prices into different country currencies for better insights.

● **UrbanNest**
UrbanNest

- UrbanNest is a full-stack web app for property listing, searching, and renting, built with React, Node.js, and MongoDB. It supports secure authentication, dynamic client-server interaction, and efficient data handling.

● **TrustFlow**
https://blockchain-t2z6.onrender.com

- Developed an MVP for a decentralized certificate verification platform using the MERN stack, Ethereum (Ethers.js), and MetaMask. Integrated IPFS (Pinata) for immutable document storage and on-chain certificate hashing for tamper-proof verification. Built secure admin/user panels enabling certificate upload and verification workflows. Implemented OTP-based authentication and designed the system for scalable expansion beyond the MVP stage.

● **Portfolio**
https://saurshra.github.io/dev-portfolio/

- Built a dynamic and responsive personal portfolio using React to highlight my projects, technical expertise,and achievements. Designed with a modern UI, the portfolio ensures seamless navigation and accessibility across devices.

EXPERIENCE

FRONTEND DEVELOPER
Web Professionals
present

- Developing and optimizing React.js applications with a focus on responsive UI, state management, and API integration.
- Implementing authentication, authorization and performance enhancements to improve user experience & application ease

EDUCATION

Universal College of Engineering, Kaman, Vasai East
Bachelor of Computer Engineering (4th Year)
Expected Graduation Year: 2026

Secondary School

Thomas Baptista JuniorCollege
2019- 2021

Technical Skills

- Frontend
- Backend
- Tailwind CSS, Bootstrap
- Project Management Tools
- Database : MongoDb ,SQL
- Creative & Professional
- Tool & Platform :Git, GitHub
